Take the 5th Street, Cesar Chavez Street exit, follow the signs to 5th Street and continue east (toward IH-35, approximately 2 miles). Turn right into the Austin Convention Center's parking garage (1 block before reaching IH-35).

# Workshop Description

## Background

Wastewater collection systems that are improperly maintained and operated can lead to sanitary sewer overflows (SSOs), a serious public health and environmental problem. The CMOM approach outlines a dynamic system management framework that encourages evaluating and prioritizing efforts to identify and correct performance problems in the sewer system.

## Purpose

This workshop will allow EPA and state regulators to come together with their municipal permit holders to discuss examples of strong CMOM practices. Presentations made at the workshop will be available for downloading by all attendees.

## Audience

All municipalities or special districts that manage wastewater collection systems, as well as their operators, engineers, and management professionals and consultants.
