

FREE WEAT WEBINAR

Assessing the Effectiveness of a Cybersecurity Program

Wednesday, May 13, 2015
11:30AM – 1:00PM

This webinar is the fifth in the WEAT Cyber Security Webinar Series and will focus on case studies where utilities have used the AWWA cybersecurity guidance tool as the basis for evaluating their system security, developing cybersecurity improvement programs, and as the basis for securing new and upgrade SCADA/PCS projects. The webinar will also present members with practical steps to take when assessing the effectiveness of their cybersecurity program such as understanding controls frameworks, structuring the assessment, and determining both presence and effectiveness of required controls. Following the presentations, our panelists will also provide their uniquely informed cyber security perspectives during a moderated Q&A portion of the webinar.

AGENDA

- 11:30 -11:35 AM – Speaker Introductions**, Safety and Security Co-Chair, Rick Hidalgo, Signature Automation, LLC
