Presentation Title: CAN HACKERS BE STOPPED?

Presenter:

- Steven Bullitt, Vice President, NTT Security
- Daryl Quesada, Director of Sales, FatPipe

Presenter(s) bio(s):

### **Steven Bullitt:**

*Steven Bullitt brings a unique government perspective to NTT Security's Solutionary executive management and threat intelligence incident response teams, serving as the vice president of cyber forensics and investigations. Steven began his career as a special agent with the United States Secret Service in July 1995. He served in various capacities with the United States Secret Service, inclusive of the Presidential Protection detail for presidents Clinton and Bush and Program Manager for the Secret Service's Electronic Crimes Special Agent Program. In January 2010, Steven was selected as the supervisor of the Dallas Field Office North Texas Electronic Crimes Task Force where he oversaw all United States Secret Service cyber and criminal investigations throughout northern Texas. Within NTT Security, Mr. Bullitt leads client-facing threat responses, forensic initiatives and provides expert public commentary on the state of cybercriminal affairs.*

*Steven earned a Bachelor of Arts degree from the University of Texas at Dallas and a Master's degree in Forensic Science Computer Fraud Investigation from George Washington University in Washington, D.C.*

### **Daryl Quesada:**

*Daryl Quesada is Director of Sales for FatPipe Networks-an OEM manufacturer of software for network security, Disaster Recovery/Business Continuity, and network connectivity. Daryl has been in Online Technology and Marketing since 2006, working with companies such as AT&T and Hibu,*

- *Robert Michael*
- *Michael Kampstra, Director of Network & Security Services – San Antonio Water System.*

Area of Interest: Water/Wastewater Industrial Control Systems

## Presentation Questions:

- Who coined the phrase “Passwords are like underwear: you don’t let people see it, you should change it often, and you shouldn’t share it with strangers”?
- What percentage of the Information Systems security breaches documented through June 2016 have targeted government, state, local, municipalities and/or utilities?
- Should you ever click on links or attachments from unknown senders?
- What do the acronyms IDS and IPS stand for?
