

# Introduction to WEAT

Protect Water,  
Protect Texas.

Clean water is an essential part of Texas and the high quality of life our residents enjoy each and every day. It is important to Texas' economy and growth. Having clean water depends on the committed individuals and vital infrastructure that protect and maintain our clean water supply now and into the future. WEAT comprises water environment professionals of varying backgrounds such as engineers, scientists, operations and collection system specialists, maintenance workers, professors/researchers, and utility managers who work together for one goal: clean water.

For more than 55 years, WEAT has been at the forefront in solving Texas' water quality challenges to ensure future generations have sustainable and accessible water for drinking, agriculture, and recreation.

**2000+**

trusted local water professionals

**55 Years**

of commitment to our shared water resources

**82% increase**

in state population over the next 50 years

**Continuous**

need for reliable water infrastructure

## Educate

We inspire Texans of all ages to take ownership of the water environment where we each live by building awareness of the value of water in our lives and how we can help protect our water resources.

## Advocate

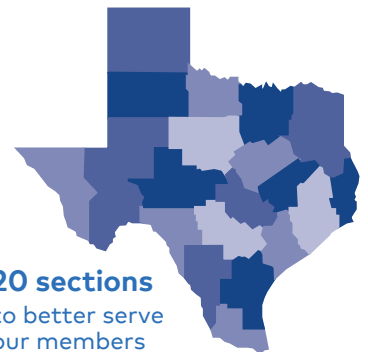

We partner with like-minded organizations, track progress of regulatory and legislative bills, and provide expert testimonies in support of responsible water policies and practices.

## Engage

We provide members with critical updates on emerging issues as well as exclusive professional development opportunities to keep you informed in an ever-changing industry.

**WEAT is your expert on water quality in the state of Texas. We exist to preserve, protect, and enhance the state's water resources for Texans to enjoy.**

**20 sections**
